Creating AI Videos and Avatars	6 lectures • 52min
Producing Marketing Content with AI	4 lectures • 25min
Understanding the Attention Economy	3 lectures • 19min
The Attention to Dollars Framework	1 lecture • 11min

## Requirements

- No prior AI or video editing experience is required
- A computer and internet connection
- Basic familiarity with online tools and websites
- Willingness to experiment with new AI content creation tools
- An interest in content creation, social media, or online business

## Description

AI content creation is evolving faster than almost any other technology in the digital world.

What once required cameras, studios, editors, and hours of production can now be done in minutes using powerful AI tools.

In this masterclass, you'll learn how modern AI content creation systems allow creators to produce high-quality videos, automate content production, and build scalable content strategies across platforms like YouTube, TikTok, Instagram Reels, and Facebook.

Whether you want to grow as a content creator, build a faceless YouTube automation channel, create UGC-style ads, or produce social media content creation workflows, this course will show you exactly how to do it using the newest generation of AI tools.

From AI avatars and voice cloning to photo-to-video generation and automated video agents, this class will show you how to turn simple ideas into fully produced videos ready to publish online.

By the end of the class, you'll understand how to go from a basic idea or script to a complete AI video using beginner-friendly workflows used by modern creators and marketers.

## What You Will Learn

In this class you'll learn how to:

- Understand the modern AI content creation ecosystem
- Create professional AI avatar videos from simple scripts
- Use AI tools for social media content creation
- Translate and localize videos automatically using AI
- Clone your voice for AI narration and automated video production
- Turn images into cinematic videos using photo-to-video AI
- Create UGC-style ads for marketing and brand promotion
- Use AI video agents to automate content production
- Repurpose long-form videos into short-form content for Reels, Shorts, and TikTok
- Build scalable workflows used in YouTube automation channels and faceless YouTube content

Throughout the course, you'll see how these tools can be combined into a powerful AI workflow used by creators, marketers, and businesses today.

## Why You Should Take This Class

Content creation is becoming one of the most valuable skills in the digital economy.

However, traditional video production is slow, expensive, and difficult to scale.

Artificial intelligence is changing this completely.

With the right tools and workflows, you can now:

- Produce videos dramatically faster
- Build scalable YouTube automation and content systems
- Create marketing content, ads, and UGC videos in minutes
- Repurpose long-form videos into short-form content for Reels and social media
- Create and manage a faceless YouTube automation channel

These modern workflows are already being used by creators and businesses to produce content at scale and grow their online presence.

In this class, I'll show you how these systems work and how you can implement them yourself.

Instead of learning random tools, you'll learn a structured AI content creation workflow that allows you to generate high-quality videos consistently.

## Who This Class Is For

This class is designed for:

- Aspiring content creators
- Entrepreneurs and online business owners
- Marketers and social media managers
- Anyone interested in YouTube automation or faceless YouTube channels
- Anyone looking to improve their social media content creation

No prior AI or video editing experience is required.

The class is beginner-friendly while still introducing powerful tools that can dramatically accelerate your content production.

## Who this course is for:

- Beginner content creators who want to start creating AI-generated videos
- Entrepreneurs and online business owners who want scalable content creation
- Social media managers looking to automate content production
- Marketers interested in AI-generated ads and UGC content
- Anyone curious about YouTube automation or faceless content channels
- Creators who want to produce content faster using AI tools
