EXECUTION & MOMENTUM	1 lecture • 13min

## Requirements

- You will learn everything as you go. The only prerequisites are consistency, follow through, and taking action.

## Description

From Zero to an AI-Powered Business isn't just another course you watch and forget.

It's a clear, step-by-step system designed to help you build a real AI-powered business as you move through it — not after. Every module ends with actionable checklists and implementation steps so you're not stuck in theory... you're making progress immediately.

You'll go from uncertainty and idea overload to a validated offer, real conversations, and a working business you actually own and control, with guidance and support along the way. Complete with prompts engineered to develop a functional and profitable business for a solo entrepreneur, even if you have no previous business experience.

You'll get a complete system that walks you step by step, with worksheets for each lecture, and a generative AI prompt listing that will help you get answers to your questions and develop everything you need using AI as your business partner. The course tells you exactly what to do, and what NOT to do.

This isn't about chasing trends or simply learning tools. It's about building independence, creating leverage, and positioning yourself to thrive in a rapidly changing economy with clarity, confidence, and real momentum.

If you're ready to stop consuming content and start building a real AI-powered business, this is where it begins.

## Who this course is for:

- Solo entrepreneurs who want to build a one person AI automated business.

I've spent over 14 years leading and building within the software and SaaS industry — starting in growth and sales roles and moving into leadership positions where I managed teams, drove revenue strategy, and helped scale operations. From leading demand generation initiatives to overseeing renewals and expansion portfolios, I learned how businesses actually grow — not just through vision, but through disciplined systems, clear processes, and consistent execution. I've worked closely with executive teams, helped implement automation initiatives, and contributed to...
